WORK EXPERIENCE

Application Developer

Oracle Financial Software Services - Pune, Maharashtra -

August 2016 to Present

• Wrote Services in java using data annotation which in turn were used for creating other files
using code generation tool.

• Jar of services with related utility files such as DTOs are deployed on the Host side.

• Host side is hosted on Tomcat Server where proxy files are present.

• Created jsff page for UI, and wrote action, helper, assembler, backing bean for UI side business
Logic made entries in collectionAppModule, PageDef.

• Used ADF & MVC architecture for building application.

Used JUnit for Testing services,Algorithms.
Also made test Suites For running multiple test case at one go.

Used Eclipse Debugger for Fixing Service Related Jiras.
Made Use of Hot Deployment for Fixing Ui related Bugs on UI side which was run on Weblogic
Server.
Used JAWS Reader for solving accessibility Related jiras and IA plugin.

Used Java to write Batches for fetching of Bulk Data at Regular Interval.
It created Thread for Multitasking to reduce the time for processing.
