

Nitin Tr
PeopleSoft Consultant

Bangalore Urban, Karnataka - Email me on Indeed: [indeed.com/r/Nitin-Tr/e7e3a2f5b4c1e24e](https://www.indeed.com/r/Nitin-Tr/e7e3a2f5b4c1e24e)

An e-commerce website I built as my college project. The website contains all the basic elements of an e-commerce website which are

The landing page, categorization of items based on filters, basic session level security, product page, Cart, share button, empty cart button, paginations etc.

It consists of a separate seller accounts where sellers can register and later upload their products to be sold, which can later be edited or deleted.

It consists of an admin panel where all the products listed can be viewed and edited by the moderator.

60 days auto delete feature, which deletes the product listing 60 days from the date of upload if seller has not modified the listing upon the next login.

Usage of Modals for registration and Login which reduces the number of pages to navigate.

Languages used: PHP, MySQL, Html, CSS, Bootstrap, JavaScript and jQuery.

WORK EXPERIENCE

PeopleSoft consultant

Oracle -

September 2017 to Present

Performing customisations, enhancements and bug fixes for front end and backend in people code using appdesigner.
