SAP Labs -

March 2012 to June 2013

Description:

Mobile Client Technology is client technology designed for Microsoft Windows-based, occasionally server-connected CRM field applications. These applications offer a rich function set, such as SAP CRM Mobile Sales and SAP CRM Mobile Service. Mobile Sales for SAP CRM allows users to access all their accounts, contacts, leads, opportunities, and activities from a single point. All relationships between these business objects are automatically mapped in the application, which allows for fast and easy navigation.

Responsibilities:

Testing the various business objects:

Opportunities, Quotation, Sales orders, Activities.

Worked on system set up (creation of sites, subscriptions), opportunity, quotation, order management.
